PROFILE

AI and Computer Vision-focused Computer Science graduate specializing in deep learning and intelligent systems. Built and deployed SafeRoad AI, an end-to-end road hazard detection system achieving 99.7% F1-score using YOLOv8 and PyTorch. Experienced in real-time dashboard development and AI-driven monitoring solutions aligned with Saudi Vision 2030. Seeking a cooperative training opportunity to apply deep learning, computer vision, and software engineering skills in a real-world environment.

EDUCATION

Bachelor of Computer Science - Artificial Intelligence Track, Jazan University 2022 – 2026

- GPA: **4.92/5**
- Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Computer Vision, Database Systems, Software Engineering

SKILLS

- Programming: Python, Java, SQL, JavaScript
- Web & Frontend: HTML, CSS, React, Next.js, Tailwind CSS, Streamlit, Framer Motion
- Backend & APIs: FastAPI, REST APIs, SQLite
- AI/ML & Computer Vision: YOLOv8, PyTorch, OpenCV, Gemini Vision API, Computer Vision, OCR
- Data Analytics & Visualization: Pandas, Matplotlib, Recharts, Data Visualization, Dashboard Development, Performance Monitoring
- Tools & Platforms: Git, GitHub, Jupyter Notebook, Vercel

COURSES

Deep Neural Networks with PyTorch, *Coursera (IBM)* 2026

Neural Networks and Deep Learning, *Coursera (DeepLearning.AI)* 2026

Data Science and AI Career Track, *Tuwaiq Academy* 2025

Data Analysis Career Track, *Tuwaiq Academy* 2025

PROJECTS

SafeRoad AI — AI-Based Pothole Detection System | Python, YOLOv8, OpenCV, Streamlit, PyTorch, Pandas, Plotly

- Developed and deployed a real-time road hazard detection system using YOLOv8, covering the full ML pipeline from data collection to cloud deployment
- Collected, cleaned, and preprocessed 1,000+ road images using data augmentation techniques to maximize training coverage and model reliability
- Achieved **99.5% Accuracy, 100% Precision, 99.5% Recall, and 99.7% F1-Score** during evaluation
- Built an interactive Streamlit dashboard for live detection visualization, confidence tracking, severity trend analysis, and real-time performance monitoring
- Designed to support smart infrastructure and road safety initiatives aligned with Saudi Vision 2030

Waraq — AI-Powered Exam Grading Platform | Python, Gemini Vision API, FastAPI, Next.js, SQLite, Tailwind CSS, Recharts, EasyOCR

- Built an end-to-end AI grading system that reads handwritten and printed exam papers using computer vision
- Achieved 100% accuracy on test cases with results delivered in under 10 seconds per exam
- Supports Arabic/English bilingual feedback with detailed improvement tips per question
- Built real-time teacher dashboard with live submissions, class analytics, score distribution charts, and CSV export
- Tested on handwritten, printed, and digital documents

Personal Portfolio Website | React, Tailwind CSS, Framer Motion

- Designed and deployed a professional portfolio website showcasing AI and software engineering projects using React, Tailwind CSS, and Framer Motion.
- Implemented responsive layouts, animated UI interactions, and modern project-focused presentation using GitHub and Vercel deployment.

LANGUAGES

Arabic — Native/Bilingual | **English** — Professional
